WORK EXPERIENCE

Software Developer

2021 – Present

Rights-S

- Developed and maintained cross-platform mobile applications using Flutter for iOS and Android.
- Built native iOS features using UIKit for performance-critical modules.
- Integrated BLE communication with Garmin devices inside Flutter apps for health data collection.
- Built and maintained RESTful backend services with Ruby on Rails.
- Self-hosted and configured Canvas LMS on a private VPS server.
- Integrated Firebase services: FCM push notifications, Analytics, and App Distribution.
- Integrated Vue.js frontend with Firebase Analytics for user behaviour tracking.
- Implemented social authentication via Google OAuth and Microsoft Azure B2C.
- Deployed and managed application servers on VPS (Linux).

EDUCATION

Information Technology

2018 – 2021

Hue Industrial College

PROJECTS

nxhung2304.vercel.app/projects

Personal portfolio showcasing selected projects built with Vue 3, Ruby on Rails, Flutter, and Supabase.
